

# Focus Project

By Leo and Harsh

# What's Going on

Rainforests are in danger because of humans. People cut down trees for wood, they pollute the environment with smog, and they destroy the trees just because they want the wood. We think that rainforests are very important, and they are.

We wanted to help the environment by donating to a foundation that helps the rainforest. That way we can help replenish the carbon cycle and climate change.

# Places we went and Important dates

First donation - Oct. 26 \$26.80.

Second donation-

# How

We donated the funds that we raised to a foundation that helped save the rainforest. 100% of the funds were donated to this foundation!

## Sites we Used

We used a donation page.
