# Introduction

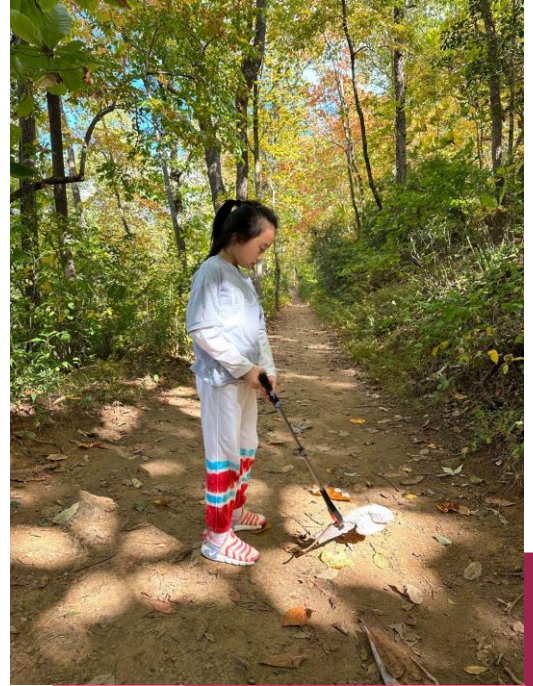

- Pick up trash in neighborhoods or parks.

I gathered materials, such as foldable grabber, lots of bags, gloves, and big trash bins. I found a place that needs litter pick-up, and I planned a date where the clean-up will be. I separated the trash into different bins. I gathered other members to help.

# Who

I picked up trash by helping climate change, less dangerous for birds, keeping humans healthy, cleaning our surroundings, keeps our city's natural beauty.

# What

If I spent just one hour today picking up trash, I would potentially remove thousands pieces of trash. The most important reason for picking up trash is the protection of the environment.

# Where

- Sims Park
- Suwanee Station
- Town Center
- My community

I helped the environment by picking up trash at places such as, Sims Park, Suwanee Station, Town Center, and in my community.

# Why

The less litter on the ground and in the ocean, the better it is. Picking up trash is worthwhile. Cleaning the environment can reduce pollution, protect endangered species, and help the Earth's natural resources. Less litter on wilderness trails brings benefit to animals and humans. Beautifying the area protecting wildlife, plant life, waterways, and soil.

# How

I used a foldable grabber and gloves to clear out litter from a section of park, and my neighborhood. When I pick up trash, I take a few photos. Share my photos with my friends and other members of my family and encourage them to clean up our environment.

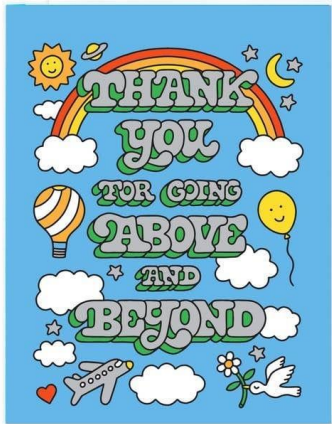

# Conclusion

Trash affect humans health, so picking up litter is an easy act of kindness that is free and always seems needed.
