

AP Physics 1 Students and AP Physics 1/2 Combo

Students need the following supplies on Day 1:

- Graphing Calculator
- Pen/Pencil
- Any notebook to organize loose pages
- Lab Notebook (See below)

The Lab Notebook should be all of the following:

- Carbonless Pages (These pages allow you to write on one page and copy your work to the next page. You will turn in the copy and keep the original for all of the lab work.)
- Graph pages. (Be careful in ordering. Some are lined for writing. Some are gridded for graphing.)
- All least 75 duplicate pages in length. AP1/2 Combo students should buy at least 100 pages.
- Top Bound is encouraged. Spiral bound notebooks tend to get ruined over time. You will not like them.

At the time of publishing this page, many suppliers are out of stock but should become available again as the fall semester approaches. The title on the cover does not matter.
