

Facts about School Attendance

Elementary students' school attendance habits often carry over into middle and high school

Excused absences and unexcused absences have similar impact on student academic performance

Missing more than five days of school each year, regardless of the cause, impacts student academic performance

Standardized test scores are significantly affected by elementary students' attendance patterns

From the 6th grade through the 9th grade, student attendance is a better predictor of dropping out than standardized test scores

While absenteeism is more widespread in middle and high school, it affects vast numbers of younger students
